

Wrong FAT

What is Happening: The system continuously initializes and shuts down

What it Means: Wrong File Allocation Table (FAT)

How to Fix:

- First step is to unplug all the cameras from the unit.
- Turn the unit on.
- Go to Setup (password up up up up)
- Go to Storage
- Go to Format and confirm format.
- It will format the HDD (recorded date will be deleted)
- Connect cameras one by one.
